**EMENTA**

Esta disciplina tem por objetivo discutir questões teóricas e práticas ligadas aos recursos automáticos de avaliação de produção e performance do aluno em ambientes de aprendizagem on-line. Tanto a natureza dos objetivos de ensino-aprendizagem, quanto a natureza das diferentes interfaces onde aparecem a produção do aluno requerem rubricas de avaliação diversificadas. Elas podem ser baseadas em categorias de conteúdo e discursivas levantadas em pesquisas sobre construção de conhecimento, presença social, tipos de interação, tipos de discurso, etc, em situações de ensino-aprendizagem. A disciplina prevê a criação, utilização e análise dessas rubricas inseridas em ambientes de aprendizagem on-line, em especial, no sistema de administração de cursos Moodle.
